WE ARE YOUR IT DEPARTMENT

PC Trends can provide you with the same level of service the IT departments of large business organizations do at a price you can afford..

Your business relies more and more on computer systems and the applications that run on them. It is important to keep up with technology to be competitive.

Small business owners know the necessity of having technology support, and struggle with the idea of having high cost internal IT support staff.

Let us help.
Whether you have a new business that needs a system implemented

and maintained, or have an aging system that needs some problems solved, we will get you up and running smoothly so that you can be free to concentrate on running your business rather than trying to deal with computer problems.

COMPUTER MANAGEMENT SERVICES

Computer & Network Assessment; Computer & Laptop Repair; Installations & Upgrades; LAN/ Wireless Networking; Network Printer Installs; NAS (Network Attached Storage); Security/Anti-Virus Solutions; Backup/Recovery Solutions; Internet Solutions; Mobile Computing Solutions; Software Support & Training; Informational Web Design & Development.

YOU WILL BE
CONFIDENT
WORKING
WITH US

Experience:

The proper knowledge, tools and experience are essential to great service. That is why we can provide you with outstanding personalized service at a fair price, that you can afford.

Right Price:

Our secret to keeping costs down is to KEEP IT SIMPLE, and do it right. For small businesses, we offer a clear strategy for maximizing your dollars so you waste less time and money maintaining your edge with up-to-date technology.

PC TRENDS

COMPANY PROFILE

Since 1998, PC Trends has been working with private and small business clients to maintain and repair their computer hardware, software and peripherals. Whether you need upgrades, repairs, or spy ware and virus removal, we have the tools, knowledge and capability to get you back on the technology life you have become accustomed to.
